CRM Information In Real-Time

CRM IMPROVE SALES PRODUCTIVITY

CUSTOMER SERVICE & PROFITABILITY

The CRM module, integrated with ERP, provides sales reps with realtime sales and customer data, simplifying order placement and customer acquisition. It ensures that any changes to customer information are instantly updated in the master database. This integration enhances efficiency and accuracy.

Consistent, Automatic CRM Business Processes Benefit the Whole Team. FDM4 CRM provides the tools to help you increase sales and productivity including drill down of credit, summary of sales, and drop ship sales; plus, rolling twelve months total sales, pieces, dozens, average days to pay, average invoice, credit limit and terms, and more.

Convenient Mobile Access. Instant access via web browser to place orders, view order status, order history, real-time accounts receivable, credit terms, and activity management.

- Built-in security and permissions to support access and ownership
- Import/Export Utility
- · Track customer communication frequency and content
- · Custom fields allow you to create unique client criteria for reporting and marketing

Oversee All CRM Activity on the System. Supervisors can view all activities assigned to each CRM user and can reassign activities for those who are absent from work.
