# DECORATION

## ENTRY AND MANAGEMENT

The Decoration Module, integrated with ERP, streamlines orders for Decorated Apparel and Promotional Products. It supports workflows involving internal stock, third-party vendors, in-house embellishments, or outsourcing. The solution is customizable to fit your business model.

**Order Plus Decoration, All From a Single Solution.** Providing the flexibility of style-based order entry with decoration, manage details from proofing, providing spec samples managing royalties, and end to end production planning and routing, all from order entry. From order entry, drag and drop a customer supplied DST File and the system automatically reads the DST header and imports dimensions and stitch count into the art details allowing for rapid order fulfillment.

STEP THREE - OPTION 1

STEP THREE - OPTION 2

**Intuitive “Decoration Charge” Pricing.** Pricing and cost calculations can be defined using multiple criteria, including stitch count, dimensions and colors across varying types of charges and costs such as digitizing, setup, decoration runs, incremental run charges and minimum order quantity surcharge.

**Automatic Status Updates.** Separate management procedures for artwork, decoration proofs, and production orders provide the tools required as decoration orders pass through the various departments. Integration to the ERP ensures that all decoration orders can be tracked in real time in the back office or FDM4 B2B.

**In-House or Third Party.** Multiple orders can be sent along with digitized files, to multiple external decoration vendors or internal decoration workstations, to complete all of the embellishments. Visibility to anticipated vendor costs and transit times with highlighted best cost or best time option for quick selection.

**FDM4 Vender Portal.** FDM4’s Decoration Portal allows third-party decorators to access and share key information pertaining to any of your outsourced decoration work. From acknowledging the receipt of blank goods, accessing work orders and art assets, to notifying you of when the work has been completed and shipped. FDM4’s Decoration Portal breaks down the walls between you and your third-party decoration vendors, providing seamless service.

**Simplify Production.** Automated creation of bill of materials and product routing, real-time production scheduling and planning. Manage plant and work center operating times, operation capacities and scheduling rules.

**Proof Management Processes.** An integrated proof management process allows you to manage and track each step of the proof and sample approval, right from storyboarding. Eliminating any communication gaps along the decoration order workflow.

**FDM4 Decoration Module.** FDM4 offers software solutions tailored to the Uniform Industry, Team Sports, Apparel Decoration and Promotional Products. Whether you are decorating products for stock decoration or on-demand orders, FDM4 has solutions for your specific needs.
