ERP INTEGRATED APPAREL SOFTWARE

SAVES YOU TIME AND MONEY

FDM4 develops scalable software solutions for apparel enterprises, supporting multi-company, multi-currency, and multi-warehouse operations. Our industry-specific ERP software is tailored to meet the unique needs of the apparel sector. It includes an apparel order entry system optimized for style, color, and size.

Industry Specific Solutions | Software Developer - Not a reseller | 45+ Years of Experience

STEP 1

Buy License
or SaaS

STEP 2

Buy or Lease
the Hardware

STEP 3

On Premise or
in the Cloud

Order Entry. Two forms of Order Entry. Standard Order Entry is designed for single line entry of items with a single size and color. Matrix Order Entry is designed with a matrix grid for rapid entry of items with multiple sizes and colors.

ERP User Homepage. Users have the ability to create an homepage in the ERP with application shortcuts, favorite contacts and activity dashboards.

Forecast Manager. The screen will display the historical data at the style level in a single warehouse location, for a current year and previous years, with drill downs to color and size.

WAREHOUSE MANAGEMENT SOFTWARE

MAKING EVERY STEP COUNT

WMS manages the entire supply chain, from procurement to shipping, regardless of inventory type or distribution model. With comprehensive productivity reporting and detailed transaction auditing at every stage, it ensures optimal utilization of all your resources—people, inventory, equipment, and space.

Mapping Manager. Intelligent build of pallet's to increase efficiency in receiving and put away.

Enhanced Customer Service. Uninterrupted visibility of inventory and order status.

Powerful Flexibility Out Of The Box. With manager-configurable business rules to enforce organizational policies and industry best practices.

Pick to tote

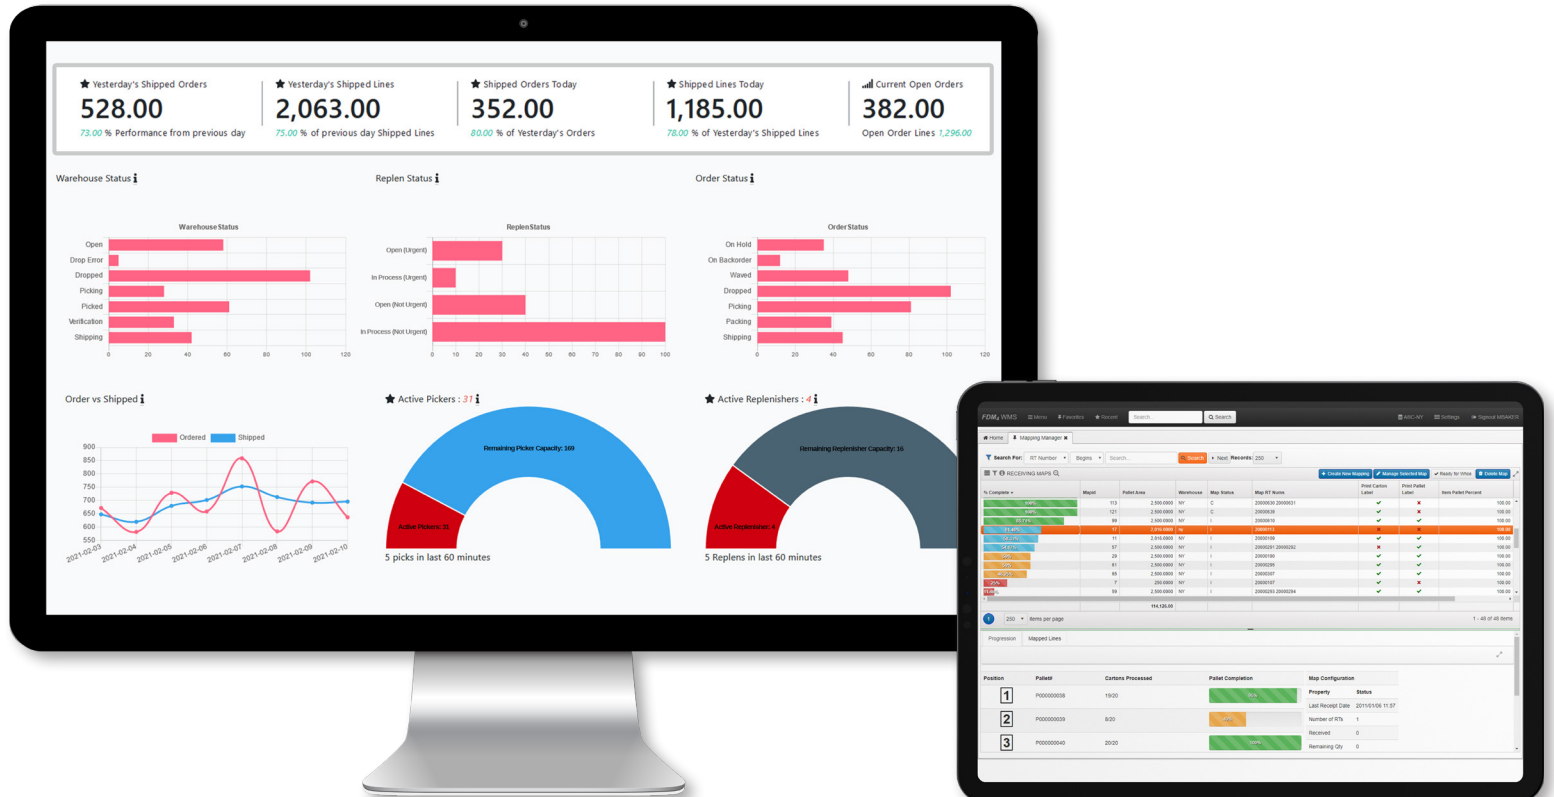

Pick to pack

Pick to pass/zone-picking

Pick to carton ID/label

Multi-order cart pick

Bulk/case picking

Achieve 99% Inventory Accuracy. With real time tracking via RF scanning and intelligent automation for cycle counts.

Rapid, Accurate Order Fulfillment. Whether you prefer paper-based, RF unit, or automated voice system, you choose the picking assignment.

Maximize Your Warehouse Space. Using the bin hit report, inventory is segregated according to ABC analysis and other user-defined rules – improving productivity and decreasing inventory holding costs.

Faster Stock Turnover. Create a just-in-time environment – with both triggered and on-demand replenishment, ASNs, planned and unplanned receiving, cross-docking, and directed and non-directed put-away.

DECORATION

ENTRY AND MANAGEMENT

The Decoration Module, integrated with ERP, streamlines orders for Decorated Apparel and Promotional Products. It supports workflows involving internal stock, third-party vendors, in-house embellishments, or outsourcing. The solution is customizable to fit your business model.

Order Plus Decoration, All From a Single Solution. Providing the flexibility of style-based order entry with decoration, manage details from proofing, providing spec samples managing royalties, and end to end production planning and routing, all from order entry. From order entry, drag and drop a customer supplied DST File and the system automatically reads the DST header and imports dimensions and stitch count into the art details allowing for rapid order fulfillment.

Art Record Management. Store your library of art and design records which can be modified and versioned and reused across multiple decoration techniques. Manage files and details as the order flows through the proofing and digitizing processes and access files and details easily and conveniently during the production process.

STEP ONE

STEP TWO

STEP THREE - OPTION 1

STEP THREE - OPTION 2

Intuitive “Decoration Charge” Pricing. Pricing and cost calculations can be defined using multiple criteria, including stitch count, dimensions and colors across varying types of charges and costs such as digitizing, setup, decoration runs, incremental run charges and minimum order quantity surcharge.

Automatic Status Updates. Separate management procedures for artwork, decoration proofs, and production orders provide the tools required as decoration orders pass through the various departments. Integration to the ERP ensures that all decoration orders can be tracked in real time in the back office or FDM4 B2B.

In-House or Third Party. Multiple orders can be sent along with digitized files, to multiple external decoration vendors or internal decoration workstations, to complete all of the embellishments. Visibility to anticipated vendor costs and transit times with highlighted best cost or best time option for quick selection.

FDM4 Vendor Portal. FDM4’s Decoration Portal allows third-party decorators to access and share key information pertaining to any of your outsourced decoration work. From acknowledging the receipt of blank goods, accessing work orders and art assets, to notifying you of when the work has been completed and shipped. FDM4’s Decoration Portal breaks down the walls between you and your third-party decoration vendors, providing seamless service.

Simplify Production. Automated creation of bill of materials and product routing, real-time production scheduling and planning. Manage plant and work center operating times, operation capacities and scheduling rules.

Proof Management Processes. An integrated proof management process allows you to manage and track each step of the proof and sample approval, right from storyboarding. Eliminating any communication gaps along the decoration order workflow.

CRM IMPROVE SALES PRODUCTIVITY

CUSTOMER SERVICE & PROFITABILITY

The CRM module, integrated with ERP, provides sales reps with real-time sales and customer data, simplifying order placement and customer acquisition. It ensures that any changes to customer information are instantly updated in the master database. This integration enhances efficiency and accuracy.

Consistent, Automatic CRM Business Processes Benefit the Whole Team. FDM4 CRM provides the tools to help you increase sales and productivity including drill down of credit, summary of sales, and drop ship sales; plus, rolling twelve months total sales, pieces, dozens, average days to pay, average invoice, credit limit and terms, and more.

The desktop monitor displays the FDM4 CRM web interface. At the top, it shows 'Company: ABC - JC Apparel | Warehouse: NY - New York'. Below this is a navigation bar with tabs like 'Home Page', 'Order Entry', and 'CRM My Accounts'. A search bar is present with 'Search: jc' and a 'Search (Auto)' button. The main area features a table with columns: Action, Customer, Customer Name, Zip/Postal, State/Prov, City, Prospect, Customer Class, Credit Region, Salesman, Sales Territory, Terms, Inactive Dt, and Sales Prev Yr. The table lists several customers, including 'JC Apparel', 'Jci International Inc', and 'JC Penney'. Below the table is a map showing the location of '1297 Airport Rd, North Bay, ON P1B 6G2, Canada'. The tablet displays the 'Customer Snapshot' for a selected customer, showing tabs for 'JC', 'AP', 'CB', and 'CBM'. The snapshot includes sections for 'Account Info' (Address, Phone, Fax, Email, Web), 'Contacts' (List of contacts with roles and phone numbers), 'Latest Activity' (Recent calls and messages), 'Account Snapshot' (Sales Rep, MTD Sales, YTD Sales), 'Sales Snapshot' (MTD Sales, MTD Sales % Var, YTD Sales), and 'Credit Snapshot' (Terms, Credit Rep, Credit Limit).

Convenient Mobile Access. Instant access via web browser to place orders, view order status, order history, real-time accounts receivable, credit terms, and activity management.

- Built-in security and permissions to support access and ownership
- Import/Export Utility
- Track customer communication – frequency and content
- Custom fields allow you to create unique client criteria for reporting and marketing

Oversee All CRM Activity on the System. Supervisors can view all activities assigned to each CRM user and can reassign activities for those who are absent from work.

VENDOR PORTAL

END-TO-END SUPPLY MANAGEMENT

Connect anywhere at any time. Vendor Portal is a browser based tool that improves communication and streamlined workflows between your corporate office and suppliers and manufacturers through a secured portal.

Streamlined the Supply Chain Process. External users can review PO's and create ASN's mapped to PO's. Labels will be printed for each style/color/size including SSCC-18/LPN numbers with individual SKU's GTIN/UPC codes.

Building Container for Shipment. A remote device running a browser will scan carton IDs to build a container/ASN.
