

FDM4 Wins Modernization Award

Last month FDM4 attended ProgressNEXT 2017 a Partner Conference geared at joining the best and brightest Progress minds in a three day interactive event. On Friday evening of the event FDM4 was honored to win the Modernization Award, North America 2016, for our new browser-based FDM4 ERP application. Congratulations to our staff and we look forward to an exciting year as we roll out this new version to our Customers.

FDM4 at PartnerNEXT 2017

ProgressNEXT 2017 - Progress promised us that the three day Progress partner event would arm us with all the tools, ideas and expertise we need to continue to build state of the art solutions, and they certainly delivered. Here are just a few of the business and industry knowledge that we gathered from the Progress Partner Event:

1. "Internet of Things" successful companies will utilize technology across different devices to facilitate automation in areas of business.
2. Cognitive Applications, applications to talk to each other without human interaction where intelligent decisions are being made by scientific reasoning.
3. Social Selling, leveraging your social network to find the right prospects, build trusted relationships, and ultimately, achieve your sales goals.

New Customers

Lane Seven Apparel has joined the FDM4 community. Located in Los Angeles, CA, - Lane Seven specializes in Ring spun apparel products.

Users' Group Spotlight

We are excited to be hosting the 2017 Users' Conference in the home city of the FDM4 America office - Las Vegas. Our current clients are invited to the City of Lights April 18th - 19th for the Users' Conference, followed by the Annual EASI Meeting on April 20th.

If you're interested in attending, but wish to know more, the Agenda is now available.

FDM4 holds a seat at Progress Advisory Council

For the 5th year in a row, FDM4 participated in the Progress Advisory Council. Open round-table discussions are held about the future needs of select Progress partners, like FDM4 to ensure we have the Progress tools we need to support our Customers. Key topics include; high availability, online schema updates, enhanced DR capability, and increased security.
