

What's New at FDM4?

Seeing is believing. Have you ever wondered where we work and what it takes to develop some of the leading software in your industry? [Check out our Corporate Video](#), and see our people in action, as we create innovative solutions and work hard to provide you with all the support you need to grow your business.

FDM4 at PPAI, Las Vegas

A must attend for anyone in the industry, FDM4 was on-site at PPAI - the largest international promotional products tradeshow, with 1,300 exhibiting companies, all hosted in the Mandalay Bay Convention Center. Tuesday evening John and Mike Cutsey hosted a cocktail event at Kumi - giving them the opportunity to touch base with current clients, and connect with colleagues in the industry. The event was a success, with guests flowing in and out all night.

FDM4 at ISS, Long Beach

Bringing together buyers, suppliers, and manufacturers, ISS in Long Beach is the largest of the 5 imprinted sportswear shows. FDM4 was walking the floor during the day, and hosted an exclusive event Friday evening at Hyatt for Clients and guests in the industry.

Employee Spotlight

This month's Employee Spotlight is on [The Collectors' Cafe Team](#)

This month we would like to recognize all the work done by the teams working on Collectors' Cafe. Having put in countless hours they were able to create a product that reflects the functionality and aesthetics that the client was hoping for. Congratulations team!

Customers in the News

Century Place/ Bermuda Sands approves v15.

Roochi Traders Inc went live on v15.

Alphabroder is our first client to upgrade to Progress OpenEdge Advanced Enterprise Edition (AEE). To learn more about this 5 in one solution, check out our technical corner.

Technical Corner

AEE is Progress' latest innovation for the OpenEdge Relational Database Management System (RDBMS). It provides proactive monitoring of all critical information assets and real-time information replication to secondary servers without coding.

An upgrade to OpenEdge AEE provides the following five solutions in one:

- **Transparent Data Encryption**
Boosts data security and prevents breaches by encrypting all/ part of your database without changing the application.
- **Table Partitioning**
Partitioning tables into smaller, more manageable units is fundamental to a continuous availability strategy.
- **Multi-Tenancy**
Spread the cost of infrastructure across your customer base and reduce development and deployment costs as you tackle the SaaS market
- **Disaster Recovery**
Near real-time continuous duplication for fast data recovery, minimizing the impact of unexpected outages
- **High Visibility Management**
Monitor database use in real-time and troubleshoot problems before they occur

For more information on AEE [click here](#).
