ERP INTEGRATED APPAREL SOFTWARE

SAVES YOU TIME AND MONEY

FDM4 develops scalable software solutions for apparel enterprises, supporting multi-company, multi-currency, and multi-warehouse operations. Our industry-specific ERP software is tailored to meet the unique needs of the apparel sector. It includes an apparel order entry system optimized for style, color, and size.

Industry Specific Solutions | Software Developer - Not a reseller | 45+ Years of Experience

STEP 1

in the Cloud

Order Entry. Two forms of Order Entry. Standard Order Entry is designed for single line entry of items with a single size and color. Matrix Order Entry is designed with a matrix grid for rapid entry of items with multiple sizes and colors.

ERP User Homepage. Users have the ability to create a homepage in the ERP with application shortcuts, favorite contacts and activity dashboards.

Forecast Manager. The screen will display the historical data at the style level in a single warehouse location, for the current year and previous years, with drill downs to color and size.

WAREHOUSE MANAGEMENT SOFTWARE

MAKING EVERY STEP COUNT

WMS manages the entire supply chain, from procurement to shipping, regardless of inventory type or distribution model. With comprehensive productivity reporting and detailed transaction auditing at every stage, it ensures optimal utilization of all your resources—people, inventory, equipment, and space.

Mapping Manager. Intelligent build of pallets to increase efficiency in receiving and put away.

Enhanced Customer Service. Uninterrupted visibility of inventory and order status.

Powerful Flexibility Out Of The Box. With manager-configurable business rules to enforce organizational policies and industry best practices.

Pick to tote

Pick to pack

Pick to pass/zone-picking

Pick to carton ID/label

Multi-order cart pick

Bulk/case picking

Achieve 99% Inventory Accuracy. With real time tracking via RF scanning and intelligent automation for cycle counts.

Rapid, Accurate Order Fulfillment. Whether you prefer paper-based, RF unit, or automated voice system, you choose the picking assignment.

Maximize Your Warehouse Space. Using the bin hit report, inventory is segregated according to ABC analysis and other user-defined rules – improving productivity and decreasing inventory holding costs.

Faster Stock Turnover. Create a just-in-time environment – with both triggered and on-demand replenishment, ASNs, planned and unplanned receiving, cross-docking, and directed and non-directed put-away.

ECOM INCREASE ONLINE SALES

ENHANCE SELF-SERVICES

Utilize the Internet as a global platform for sales and service delivery, accessible to your customers anytime, 24/7. This approach offers significant advantages, including streamlined back-office operations, improved customer service, and increased sales revenue.

Responsive Product Page Templates. Ensure that your site looks and works great regardless of which devices your customers use all managed via one set of data and code eliminating the need for separate mobile sites. Page specific template properties.

An Enjoyable Shopping Experience. In-page editing, multiple publication launches, auto image creation via single high resolution image, Multi-language support, Catalog Management with drag and drop, Catalog Browsing with filters including color.

Search Engine Optimization. Dynamic load balancing in a multi-tier environment enables sub-second transaction processing and supports thousands of users during peak loads.

Fully Integrates With Your ERP Solution. Seamless communication between both systems provides real-time information about to stock availability, pricing, order and delivery status, with powerful account management tools.

Customer Specific Catalog and Pricing. Create customer-specific product catalogs and set personalized pricing with options for volume discounts, offers, coupons, and gift cards.

Smooth and Secure Checkout Process. Real-time shipping rates from: UPS, FedEx, USPS. Flexible payments options; PayPal, Credit Card with PCI-compliance, ACH (automated clearing house) and credit terms. Email notifications of orders and shipments.

DECORATION

ENTRY AND MANAGEMENT

The Decoration Module, integrated with ERP, streamlines orders for Decorated Apparel and Promotional Products. It supports workflows involving internal stock, third-party vendors, in-house embellishments, or outsourcing. The solution is customizable to fit your business model.

Order Plus Decoration, All From a Single Solution. Provides flexible, style-based and item-based order entry with integrated decoration management. Easily manage proofing details, specification samples, royalties, and end-to-end production planning and routing—all from a single solution. Simply drag and drop a customer-supplied DST file, and the system automatically reads the DST header, importing dimensions and stitch counts directly into the art details for faster, more accurate order fulfillment.

Art Record Management. Store your library of art and design records which can be modified and versioned and reused across multiple decoration techniques. Manage files and details as the order flows through the proofing and digitizing processes and access files and details easily and conveniently during the production process.

STEP ONE

STEP TWO

STEP THREE

STEP FOUR

Intuitive “Decoration Charge” Pricing. Pricing and cost calculations can be defined using multiple criteria, including stitch count, dimensions and colors across varying types of charges and costs such as digitizing, setup, decoration runs, incremental run charges and minimum order quantity surcharge.

Automatic Status Updates. Separate management procedures for artwork, decoration proofs, and production orders provide the tools required as decoration orders pass through the various departments. Integration to the ERP ensures that all decoration orders can be tracked in real time in the back office or FDM4 B2B.

In-House or Third Party. Multiple orders can be sent along with digitized files, to multiple external decoration vendors or internal decoration workstations, to complete all of the embellishments. Visibility to anticipated vendor costs and transit times with highlighted best cost or best time option for quick selection.

FDM4 Vendor Portal. FDM4’s Decoration Portal allows third-party decorators to access and share key information pertaining to any of your outsourced decoration work. From acknowledging the receipt of blank goods, accessing work orders and art assets, to notifying you of when the work has been completed and shipped. FDM4’s Decoration Portal breaks down the walls between you and your third-party decoration vendors, providing seamless service.

Simplify Production. Automated creation of bill of materials and product routing, real-time production scheduling and planning. Manage plant and work center operating times, operation capacities and scheduling rules.

Proof Management Processes. An integrated proof management process allows you to manage and track each step of the proof and sample approval, right from storyboarding. Eliminating any communication gaps along the decoration order workflow.

VENDOR PORTAL

END-TO-END SUPPLY MANAGEMENT

Connect anywhere at any time. Vendor Portal is a browser based tool that improves communication and streamlined workflows between your corporate office and suppliers and manufacturers through a secured portal.

Streamlined the Supply Chain Process. External users can review PO's and create ASN's mapped to PO's. Labels will be printed for each style/color/size including SSCC-18/LPN numbers with individual SKU's GTIN/UPC codes.

Building Container for Shipment. A remote device running a browser will scan carton IDs to build a container/ASN.
